

Job Title:	Electrical Engineer III (7014)
Closing Date:	Open until filled
Salary:	\$84,452.49 - \$111,114.38/year
Job Type:	Full-Time
Location:	DPU-E Distribution & Engineering, 1392 Aurora Ave., Suite 100
Department:	Department of Public Utilities - Electric

Job Description:

The City of Naperville's Electric Utility is currently seeking an Electrical Engineer III to develop and/or lead teams in studies, plans, criteria, specifications, calculations, evaluations, design documents, performance assessments, integrated systems analysis, cost estimates, and budgets associated with the planning, design, licensing, construction, commissioning, operation, and maintenance of Naperville's electric utility system. The Electrical Engineer III reviews financial data to compare between budget and actual costs of projects and takes appropriate actions resulting from analytical review.

This position will create, update, and apply internal/industry standards and technology in a specialized area of expertise and provide technical expertise to help make strategic and operational decisions. Project assignments typically include performing complex engineering work requiring the application of standard techniques, procedures, and criteria in carrying out engineering tasks.

The Electrical Engineer III may train, mentor, and supervise others and may be required to work extended hours and/or make site visits.

The full salary range for this position is \$84,452.49 - \$137,776.28/year commensurate with credentials and experience.

Responsibilities:

- Performs engineering tasks associated with critical engineering projects or multiple small projects with many complex features including financial oversight.
- Reviews electrical, communication, structural, mechanical, and civil drawings for compliance with contract documents and City, State, and Federal standards.
- Provides information to and answer questions for the general public.
- Manages the construction and inspection of capital improvement projects for electric distribution, transmission, SCADA, or Smart Grid systems.
- Administers large dollar projects with responsibility for scope, schedule, and budget.
- Attends and/or schedules various meetings including pre construction, coordination, and conceptual design.
- Manages support vendors and maintains quality assurance of third-party designs.
- Expected to work in a collaborative team environment on projects involving new design, modifications, retrofits, or preliminary/conceptual designs related to utility scale power systems.
- Evaluates changes in project scope and recommends solutions to the City's contractors and to the Director of Public Utilities Electric.
- Functions as a Subject Matter Expert for a given field.
- May supervise a few direct reports. Trains and mentors employees under supervision.
- Performs all other related duties as assigned.

Qualifications:

Required

- A Bachelor's Degree in Electrical, Mechanical, or Civil Engineering.
- Four to seven years of professional engineering experience including a proven record of engineering moderately complex projects.
- Proven, demonstrated abilities to analyze and interpret complex electrical and mechanical systems.
- A valid State of Illinois Class D driver's license.

Preferred

• A Professional Engineer License.

Additional Information:
